

KITTEN MILESTONES

What to expect when you're adopting

Congratulations on your new family member! If this is your first kitten or even if it's been awhile since you've had a really young one in the household, here are a few milestones to help you track your cat's progress. Keep in mind these are general guidelines and can vary based on your kitten's breed and other factors.

4 KITTEN MILESTONES

1 2 WEEKS—The kitten's eyes start to open and its sense of smell begins developing. Fun fact: All kittens are born with blue eyes.

2 3 WEEKS—The kitten's sense of smell is fully developed, its ears become erect and baby teeth begin to appear.

3 4 WEEKS—The kitten starts to explore and will start grooming.

4 5 WEEKS—The kitten's sight is fully developed. It starts using a litter box.
